DETAILED ACTION

1. This action is in response to Applicant's amendment, filed on October 06, 2003 have been considered but are deemed moot because of Restrictions Request below.

Election/Restrictions

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, 29-39 and 43, drawn to a system for spawning process when a file and a directory copy, classified in class 707, subclass 1.
- II. Claims 20-21, drawn to a method for increasing a limit on a resource for copying file, classified in class 711, subclass 2.
- III. Claims 22-23 and 40, drawn to a method for transferring data from a file into a temporary buffer in memory to use file archiving, classified in class 707, subclass 204.
- IV. Claims 24-28 and 41-42, drawn to a method for sending an e-mail message if an error encountered during copying, classified in class 709, subclass 206.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for spawning process when a file and a directory copy. Invention II can be used for increasing a limit on a resource for copying file. Invention III can be used for transferring data from a file into a temporary buffer in memory to use file archiving. Invention IV can be used for sending an e-mail message if an error encountered during copying. See MPEP 806.05(d).

4. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III and Group IV each other, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
